

ZONE — RESULTS (Component 7)

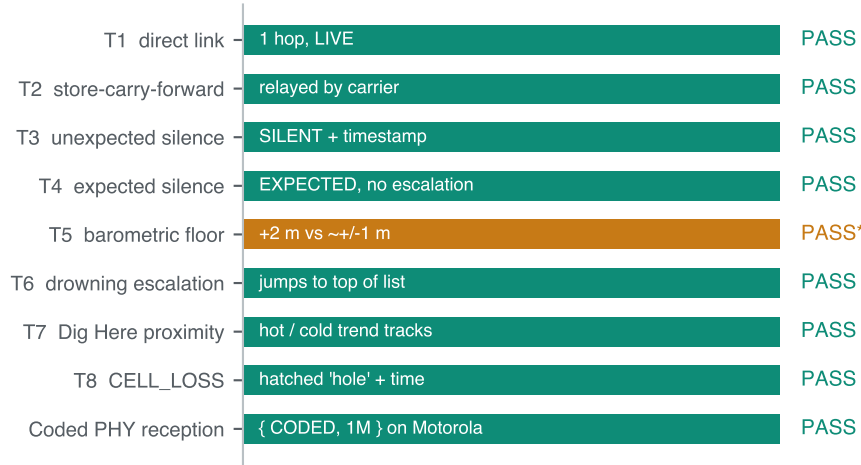

A · Comparison with prior art

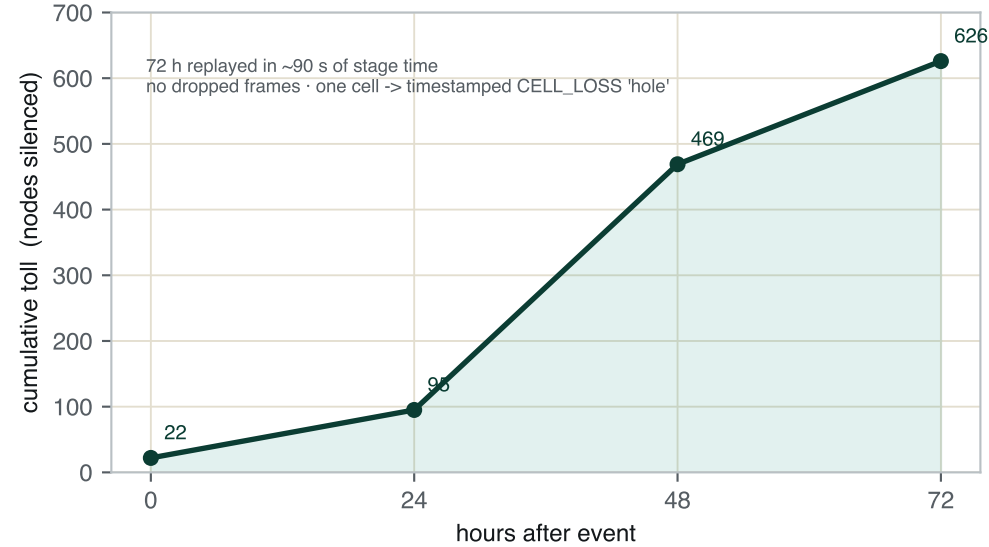

B · Battery-adaptive duty cycle (measured, Realme 7)

C · Functional validation — 3 phones, airplane mode
8 / 8 tests PASS (* T5 borderline: +2 m vs ~±1 m spec)

D · 500-node simulation — real 2015 Rasuwagadhi curve

9 capabilities scored: no infrastructure · no pairing / GATT · works when the user is unconscious · dual-PHY (Coded) · battery-honest duty cycle · infers area destruction from silence · vertical (floor) triage · Sybil resistance · confidence-scored map

Engineering: 31-byte packet · 87 JVM unit tests (100 % pass, CI on every push) · 500-node simulator · duty cycle 1 s to 300 s · CELL_LOSS detected within the 120 s window · state survives an OS kill (24 h cutoff)
